(b) if so, in what way Government propose to change the present education system alongwith the outline thereof; and

(c) if not, the reasons therefor?

THE MINISTER OF STATE IN THE MINISTRY OF HUMAN RESOURCE DEVELOPMENT (SHRIMATI D. PURANDESWARI): (a) (to (c) The Government has always accorded importance to employment oriented system of education. While elaborating on essence and role of Education, the National Policy on Education (NPE), 1986 has recognized that Education develops manpower for different levels of the Economy.

The NPE 1986 also envisages the introduction of systematic, well-planned and rigorously implemented programmes of vocational education. These elements are meant to develop a healthy attitude amongst students towards work and life, to enhance individual employability, to reduce the mis-match between the demand and supply of skilled manpower, and to provide and alternative for those intending to pursue higher education without particular interest or purpose. The policy envisages that efforts will be made to provide children at the higher secondary level with generic vocational courses which cut across several occupational fields and which are not occupation specific.

The National Policy on Education also envisages the delinking of degrees from jobs in selected areas. Delinking is to be applied in services for which university degree need not be a necessary qualification.

However, Government is not in favour of excessive emphasis on skills, employment and corporate oriented education at the cost of Basic Sciences and Humanities which is fundamental to our all round development, material and spiritual.
